Professional Summary

Backend Developer with 4 years of experience in building scalable web applications, RESTful APIs, and real-time systems using Laravel, PHP, Node.js, JavaScript, MySQL, and AWS. Experienced in live streaming platforms, trading applications, CRM systems, and payment gateway integrations. Strong background in backend architecture, API development, and performance optimization.

Work Experience

Software Developer

StreamOn Technologies Pvt Ltd, Mumbai | Jul 2024 to Dec 2025

- Designed and developed analytics-driven REST APIs to capture and process real-time user engagement data, enabling accurate measurement of audience participation during live virtual events.
- Built interactive engagement features such as quizzes, emoji reactions, polls, and surveys to help clients analyze user interest levels and improve audience retention.
- Developed a real-time chat application that allowed presenters to broadcast important announcements and share key updates instantly during virtual sessions.
- Integrated the Agora SDK and enhanced live-streaming functionality by implementing custom background features and optimizing overall streaming performance.
- Laravel, NodeJs, JavaScript, AWS (Lambda, EC2, S3, CloudWatch)

Backend Developer

ABC Designs, Mumbai | Aug 2022 – Mar 2024

- Contributed to a fully-fledged online trading application from scratch, implementing core financial features such as deposit and withdrawal functionality, market open and close operations, and RESTful API integrations.
- Developed a share market web app supporting live trading of gold and silver, including features like market orders, limit orders, stop-loss, and withdrawals.
- Integrated e-commerce module for purchasing physical gold and silver, combining trading and shopping in a single platform.
- Laravel, JavaScript, jQuery, MySQL, Razorpay

Jr. Software Developer

Vineet Marketing & Technology Pvt Ltd, Mumbai | Nov 2021 – Jul 2022

- Delivered 2+ MLM web applications using Core PHP and MySQL, tailored to specific business logic and compensation models. Also contributed to logistics and e-commerce projects, supporting full-stack web development.
- Designed and implemented a complex hierarchical level plan for an MLM project, engineering backend logic for multi-tier commission structures and bonus mechanisms. Developed administrative features for seamless franchise assignment, ensuring accurate data handling and automated calculations across all distribution levels.
- Core PHP, JavaScript, jQuery, MySQL, Razorpay
